Summary

Frontend Developer with experience in React, TypeScript, Redux, Chakra UI, and Ionic.
I enhanced the organization within one of my teams by implementing a ticketing system, resolving various estimation and organizational challenges during product development.

Over time, I realized I have a strong ability to lead, and I aspire to guide a team in the future. My colleagues recognize me for my interpersonal skills, as I foster a collaborative and trusting work environment.

I have experience working with external clients, and I demonstrate adaptability and commitment to the success of the project.

Experience

Smithii

JR. Front-End Developer

REMOTE

AUG 2023 - NOW

I'm a founding member of an international team, building the next gen tools for crypto and token creation/managment.

For Smithii's SAAS, I created:

- Dashboards.
- Interactive graphs.
- Pushed for ticketing system.
- Chat integrations

I work in tools team and general software team.
